

Short Term Course on Sustainable Waste Management Practices

The Union Government of India has launched Clean India Mission (Swachh Bharat Mission) with an aim to mobilize masses to create a clean India, because the requirements for environment protection and thinking that how our country, state or even any city can have better environment for conducive living conditions. According to the Central Pollution Control Board (CPCB), the average solid waste generated in India ranges from 0.21 to 0.5 kg per capita per day. In this scenario, the Indian School of Mines at Dhanbad is organizing a short term course on 'Sustainable Waste Management Practices'. The event has been planned to be conducted at ISM Industry Institute Interaction Facility in Kolkata. The major aim of the program is to provide a comprehensive knowledge towards ways for safe and efficient utilization and scientific management of waste so as to recognize it as an asset or resource.
